Gameplay

Raffle for WL

Sonichu Game

To get a WL spot you have the chance of 1:10 to win one of the 100 places reserved for Early Buyers. All you have to do is to buy a raffle ticket. The SC will auto add you to the WL list if after the 1000 ticket sale is completed, your address will be chosen by ChainLink's VRF as a winner.

The WL winners will then be the first ones to engage in trading the \$CHCH token, having a guaranteed Early Buyer whitelist spot. This ensures anti sniper protection and allows anyone to have a chance at being an Early Buyer, purely based on VRF's outcome. The Early Buyer allocation is capped at max 0.1% of the total \$CHCH token supply.

The ChrisChan website will host a game, that by Web3 authentication will allow anyone to play the first level of the game for free.

To be able to access higher game levels, starting from L2, each player must stake \$CHCH tokens for at least two weeks. Staking the tokens will result in a staking reward, as a percentage of the total staking supply. But, as staking goes, if you are not playing the game each day, for the whole staking period, it will result in slashing the staked sum by 25%. The slashed amount will be added to the Total Staking Supply inside the staking SC, to be distributed as staking rewards to the rest of the players.

Each week there will be a Leaderboard and the first 3 places will earn an NFT that will boost the staking rewards for a week with 50%.

@sonic_hedgehog Will I be able to play as Sonichu in Sonic: Doom: Fire and Ice?

Sonic the Hedgehog (@sonic_hedgehog) Follow

@Charganium Maybe, but only if we give Sonichu blue arms, three scarves, and ultimately just redesign him as Big the Cat.
